

HossainDyeing
always one step ahead

AT A GLANCE

Anwar Group of Industries (AGI) is a name associated with the words Honesty, Integrity and Heritage. Diversified into seven major industrial and business sectors, Anwar Group plays a vital role in the economic development of Bangladesh. With numerous industrial units and several trading & service sector units, the company has grown to be one of the largest conglomerates in the country, and is now well poised to make its mark in the global arena.

The legacy of Anwar Group stretches back to the year 1834 when Late Laik Mohammed started business as a trader of hides and skins. Mr. Laik Mohammed believed that consumer satisfaction was the most important thing in business. This conviction has become the pillar by which Anwar Group of Industries operates. Another man who has equal contribution in the growth of Anwar Group is his grandson Late Rahim Baksh. Mr. Rahim Baksh built the industrial foundation of what is today known as Anwar Group when he set up an ivory button & comb manufacturing plant in East Pakistan.

Anwar Group was molded into shape by none other than Mr. Anwar Hossain, a man with incredible foresight and innovativeness. Mr. Anwar Hossain became one of the first Bengalis to set up and operate a silk textile unit in the early sixties in a West Pakistan dominated industry. This marked the rise of Anwar Group and the company did not have to look back ever since. Mr. Hossain's ambition, guidance and foresight have given Anwar Group the distinction of being the first manufacturer of Saree (traditional Dress of Bangladeshi women), electrical cable, polyester fabrics, PTFE tape, UPVC Fittings and super enamel copper wire in the country.

Anwar Group emphasizes on speed, efficiency, flexibility and innovation in every aspect, from product development to manufacturing, and procurement to distribution. This was achieved with the help of more than 12,000 employees that the company employs, who they consider to be the backbone of their success. Together Anwar Group and their many partners have succeeded in creating a local and international network who collaborate with the aim of creating a more prosperous Bangladesh.

Anwar Textile is a collective name given to the textile division of Anwar Group of Industries. It comprises of five different companies: Hossain Dyeing & Printing Mills Ltd., Mehmud Industries (Pvt) Ltd., Anwar Silk Mills Ltd., Anwar Printex & A1 Printex which supplement each other to create the complete textile vertical. However, its growth into one of the largest textile manufacturers in Bangladesh started humble beginnings. In 1969, the current Chairman Mr. Anwar Hossain established "Anwar Silk Mills Ltd". Operation commenced with 30 workers and 20 Japanese Jacquard looms making moonlight fabrics. The factory took off the ground in 1971 when they started manufacturing the famous "Mala Saree" which became a favorite of Bangladeshi women for its quality, design and price. Anwar Silk Mill Ltd. was later joined by Hossain Dyeing and Printing Mills Ltd. in 1982 and Mehmud Industries (Pvt.) Ltd. in 1996. Currently Anwar Textile takes pride in a weaving unit of more than 370 looms, a modern spinning unit with 47,136 spindles, a rotor spinning unit, a state of the art dyeing-printing & finishing unit and a yarn dyeing unit.

Hossain Dyeing

Hossain Dyeing is a vertical setup of spinning, weaving, dyeing, printing & finishing and terry towel manufacturing facilities under one roof.

Our line of products are -

Hossain Dyeing and Printing Mills Ltd. is suitably equipped with most advanced and sophisticated machineries largely from Europe and Asia. To capitalize growth opportunities both in domestic and international market, the HDP produces a wider range of quality products since its inception in 1982. This facility vertically integrates weaving, yarn dyeing, fabric dyeing, fabric printing and towel processing as well.

Sustainability has always been a principle part of our mission and due to that we have turned a major portion of our product in sustainable raw materials like, Organic, BCI and we are also offering GOTS, OCS and Well BCI certificates for finished fabrics and of course covered with Safe Dyes and Chemicals.

To support and walk with sustainability and towards a sustainable future with modern ETP/CRP/WHRB is fully functional in our plants and we are on a route to zero discharge.

We are Certified by ISO 9001:2008, Oeko-Tex Standard@100, BSCI, SEDEX, ETP (DETOX), and GOTS.

GREEN TECHNOLOGY

"Environmental sustainability is a major concern for today's world and is an issue that has to be at the heart of the strategies of producers, brand owners and fashion retailers. Innovations must be largely driven by sustainability concerns and a need to create awareness about green methods of industrialization. Anwar Textile has established a platform that aims to address these pressing needs and find adaptable and effective solutions by collaborating with member organizations."

Hossain Mehmood
Managing Director, Anwar Textile

MASTERING THE ART OF **SUSTAINABLE** INNOVATION

Our initiatives to protect Environment

Sustainability - A Key Driver of Technological Innovation

As the world struggles with environmental challenges, manufacturers are actively integrating sustainability principles into their business models. Despite previous concerns over reputation management, companies now realise that sustainability programs will make a positive contribution to their competitive edge and bottom-line. In the textile industry, the production chain - from fiber manufacture to finished product - has many environmental impacts. Hence, sustainability now tops the agenda for manufacturers,

fashion brands and retailers. Concerns about efficient use of resources, low carbon footprint, material wastage reduction and recycling have materialized new approaches to sourcing and investments. In addition, fast fashion cycles and a competitive business atmosphere have led to horizontal and vertical integrations within and across the textile and garment industry. The exciting array of new materials and technical textiles has also opened up new opportunities by creating innovative products and new demands.

C.R.P - Caustic Recovery Plant will concentrate wash liquor and using the same back in Mercerizing MC. Our policy to save wastages of various resources and recover it profitably wherever possible.

ETP - is an integral part for a Dyeing House, We have fully functional ETP working to treat the effluent. We strictly maintain the PH, Temperature, TDS, TSS, BOC and COD regularly of the effluent.

Boiler economizer - are mechanical devices intended to reduce energy consumption and perform a useful function such as preheating a fluid. The boiler economizer is essentially a heat exchanger that makes a system more energy efficient.

EBG - in Hossain Dyeing we have successfully installed Exhaust Gas Boiler which is saving money and saving the environment by releasing less temperature to nature.

DYEING & FINISHING

Hossain Dyeing and Printing Mills Ltd. is suitably equipped with most advanced and sophisticated machineries largely from Europe and Asia. To capitalize growth opportunities both in domestic and international market, the HDP produces a wider range of quality products since its inception in 1982.

Hossain Dyeing

mahlo

The name Hossain Dyeing is a renowned name for Woven fabrics. We are equipped with advanced machinery and are committed to expand and further upgrade our facility. We are happy to announce that we have already install Continuous Dyeing Range (CDR) in our facility with the Continuous Bleaching range.

And as part of product diversification we have successfully installed the Linen and Linen Blend products processing plant here in Bangladesh. Our other processes included woven fabric dyeing, yarn dyeing, fabric printing and towel processing.

The range we cover is RFD, Reactive, Pigment, and many more for peace dyed option.

We use best dyeing staff combined with up to dated dyeing technology to provide the best products.

YARN DYEING

Hossain Dyeing's Yarn Dyed unit operates as one of the main Yarn Dyeing options for Knit Garments manufacturer in Bangladesh and in house source for Hossain Dyeing's Yarn Dyed Woven Fabrics, with an annual capacity of 3600 tons per year.

Hossain Dyeing

We are comfortable to dye 100% cotton, CVC, PC , Double yarn for Sweater, Cross Dyed for TC or CVC, Double part Dyeing, Fluorescent Dyed, Spun Poly, Filament , Viscos, Linen and Linen Blends, For both Woven and Knitted fabrics.

State of the art European Machines has been installed to serve the best to our valued customer, our experts have in depth knowledge for the finest quality production.

We have a soft winding capacity for 12 Tons, Dyeing capacity 10 Tons, Hydro Extractor 11 Tons, Dryer Capacity 18 Tons and Random Winding capacity 11 Tons per day for the all the process.

FABRIC PRINTING

Hossain dyeing has one of the country's largest printing operations including an in house full facility of design and development. We are supporting customer for both Woven and Knit fabrics printing with a capacity 1,50,000 Yds/ day for woven and 8500 Kgs of Knit fabrics printing facility. Our offering includes both Reactive and Pigment Print.

Hossain Dyeing

We have Two Zimmer Rotary printing and 4 Flatbed machine in our mills.

Again, with the commitment of diversification we installed successfully Digital Printing Facility in our Mill.

We are producing more than 6 Million meters of Peace dyed and Printed fabrics in Hossain Dyeing.

WEAVING SECTION

Weaving Mills is where our group's chairman, Al Haj Anwar Hossain began his industrial dreams, over 50 years ago.

Hossain Dyeing

Starting from 30 units of weaving looms, we have expanded our weaving unit which now includes state-of-the-art and latest generation Air jet, Rapier and Terry shuttle-less looms. Our continued investment in technology and our people means we are able to work on fine fashion fabrics all under the watchful eye of a team of dedicated and highly skilled weavers and textile designers.

TERRY TOWEL

We are proudly producing quality terry material for our customers. Along with that, we are providing Luxury and Grace in your shelf and Bathroom.

Hossain Dyeing

Our Towels are extremely plump and soft in which fluffiness prevails even after extensive washing.

POOL TOWEL

Our pool beach towels are made with 100% Cotton which is extremely soft, absorbent and warm.

BATH TOWEL

Our bath towels are super soft, comfortable, long lasting and convenient.

BABY BLANKET

We produce a reversible, super-soft, unisex baby blanket.

MEHMUD INDUSTRIES

Hossain Dyeing has a pioneering modern spinning facility named Mehmud Industries. This project was designed as a backward linkage industry for the export-oriented RMG sector.

Hossain Dyeing

Our production capacity is 40 Ton/ Day with more than 47,000 spindles and 600 rotors.

Our facility aligns with a wide range of customer demand for Cotton, CVC, Viscose, Slub, Compact and Combed-carded yarns.

We select the best source to select the fiber for our spinning facility.

We have modern European machinery combined with the best expertise to take care of the finest quality of yarn.

LAB FACILITIES

To attain true customer satisfaction, the well-equipped lab conducts a color matching test for Lab Dip. This area is equipped with modern instruments from the world's leading manufacturers. Color measurement and matching are monitored to the extent of precision.

Hossain Dyeing

Focused on innovation and buyer's fashion preferences, the analytical functions of the lab incorporate chemicals, dyes yarn testing and fabric analysis.

LAB FACILITY

- Modern Data color machine for color matching & color selection
- Automatic dispensing system for color matching
- Automatic pipette system
- Tensile strength
- Tear strength
- Abrasion & Pilling resistance
- Thread count & Fabric weight

WE ARE USING INTERNATIONALLY ACCEPTED TEST PROCEDURES AND MATERIALS.
